

Server Setup

The backend is a Node.js environment utilizing the Express.js web framework.

Setup Commands

```
cd server  
npm init -y
```

Key Dependencies Installed

- `express` : The core web server framework.
- `mongoose` : Object Data Modeling (ODM) library for MongoDB.
- `jsonwebtoken` & `bcryptjs` : For secure password hashing and stateless JWT authentication.
- `socket.io` : For the WebSocket server.
- `cors` & `dotenv` : For cross-origin resource sharing and environment variable management.
